

Orlando FSDO FAAST Team presents:

Night Flying - Anticipation and Expectation

Night Flying - Anticipation and Expectation
Perhaps you're a pilot who is well experienced with night flying; maybe you're a pilot who only occasionally flies at night. You no doubt anticipate some of the challenges associated with night flying and have often experienced the satisfaction of having completed another successful flight through the darkness to your destination. Or, you may one of a number of pilots who choose not to fly at night as a risk mitigation, but you owe it to yourself to remain aware of night flying techniques should you ever need to complete a sortie after sunset.

Discussions during this WINGS seminar will review the regulatory requirements, currency & proficiency considerations, WX phenomena, operational hazards, physical limitations, and other joys & challenges affecting our flights after the sun sets. Come join the discussion with your fellow aviators, learn, and share your experiences with night flying so we may all become safer pilots.

Participation in this seminar will validate 1 Advanced Knowledge Credit for your next WINGS phase and will serve as the monthly EAA/IMC Club meeting. Your knowledge is valuable to other pilots with less experience than you may have; please participate and share.

Event Details

Mon, Nov 21, 2016 - 19:00 EST
Vigilante Room, Sanford Airport
(KSFB)

1200 Red Cleveland Blvd., Sanford,
FL

Vigilante Room at Orlando Sanford
Airport

Sanford, FL 32773
